

ELECTRIC RATE ADJUSTMENTS

WE CARE RATE RIDER

(With Efficiency, Conservation And Renewable Energy)

Applicability:

Applicable to all metered and unmetered consumers receiving Electric Service from Holy Cross under Tariff Sheets 15 - 26.

Purpose:

This Rate Rider shall be used for funding renewable energy generation, energy efficiency and conservation measures. Any monies not spent in a calendar year will be held in reserve for funding of the above purposes in future years.

Monthly Rate:

Two percent shall be surcharged on the aggregate sum of all Electric Service revenues prior to the application of any taxes and any electric rate adjustments identified under Tariff Sheets 28, 32 and 34.

Electric Service Revenues:

Generally consist of the following:

- Base Consumer Charge
- Consumer Charge
- Demand Charge, per kW
- Device or Fixture Charge
- Energy Charge, per kWh
- Generation and Wholesale Power Cost Adjustment Rate Rider (PCA) Charge
- Local Renewable Energy Rider (Optional) Charge
- Minimum Monthly Charge
- Off-Peak Energy Charge, per kWh
- On-Peak Energy Charge, per kWh
- Power Supply Energy Charge, per kWh
- Power Supply Peak Demand Charge, per kW
- Service "Loss Factor" Revenue Adjustment Rider
- Wind Energy Rider (Optional) Charge
