

Power+

Member Benefits

- Short-term resilience – Ability for HCE members to keep power on during outages.
- No upfront cost for storage – Power+ allows members to utilize 0% interest on-bill payment over 10-year period.
- HCE peak savings – Helps keep HCE peak energy costs down, benefitting all HCE members.
- Renewable integration – Battery storage helps HCE manage its renewable energy supply through flexible charging and discharging of the Powerwall 2s.
- Compliance with renewable energy county code – Installer will ensure all required permitting for each jurisdiction.
- New technology – Provides access to new technology for early adopters.
- Resilience - Batteries are an excellent source of backup power, and a nice addition to your grid tied service.

Rebates, Credits, and Charges

- **Install Cost / Powerwall 2(s)** – Varies by homeowner parameters and actual installation costs.
- **Distributed Energy Resource (DER) Service Agreement Monthly Member Payment** – Under our DER Service Agreement, HCE will pay for the battery and its installation costs upfront for members. Members repay HCE with the monthly charge on the bill, which is partially offset by ongoing bill credits that member receives in exchange for the periodic control of the battery. The repayment amount does not include interest or additional fees for ten years.
- **Distributed Flexibility Tariff (DFT) Credit for HCE control** - Program participants will receive \$51.50 in energy credits monthly **per battery**. The Member's electric loads and infrastructure will determine the number of Powerwall 2s. The average member receives 2-3.
- **Total Member HCE Bill** – The Power+ program includes the HCE incentives, DER Service Agreement payment, and DFT credit. HCE anticipates a net repayment amount of \$30 to \$60 on the member's bill. This fee will vary depending on the exact installation costs of your system. The system and installation costs that HCE paid upfront will be repaid to HCE over ten years through the Power+ monthly charge; however, the energy credits will continue longer if the member wishes to remain in the program.

Monthly DERSA Payment	\$ 145.83
Monthly DF Credit	\$ (103.00)
Monthly Net Cost (Credit)*	\$ 42.83

*Sample member bill. Costs vary based on exact installation of your system.
